3. DESCRIPTION
TEC® Crack Isolation Sheet Membrane is a peel and stick underlayment that is designed to be used under ceramic tile, natural stone or other hard surface flooring to reduce surface cracking and contribute to sound suppression. Interior floors and counter top use only.

After priming with TEC® Multipurpose Primer, TEC® Crack Isolation Sheet Membrane can be easily applied to any clean subfloor surface including concrete*, plywood, gypsum, OSB, and over most existing vinyl, tile or natural stone floors.

* Concrete with moisture vapor emission rates (MVER) up to 5lbs. per 1,000 sq. ft. per 24 hours (2.27 kg/93 m²/24 hours).

Key Features and Benefits
• Peel and stick for quick and easy install – start floor installation immediately after product is set in place
• Approximately 40 mil thick for a lower profile finish floor
• Protects ceramic tile, natural stone or other hard surface flooring from in-plane cracks and movement up to 3/8" (9 mm)
• Meets or exceeds ANSI A118.12
• Delta IIC Rating 16 dB per ASTM E2179-03

Packaging
1 Roll: 225 Sq. Ft. (20.9 m²) Product #3702008111
39.25" (99.7 cm) wide x 69' (21 m) long
28 lbs. (12.7 kg)

Coverage
225 Sq. Ft. (20.9 m²)

Suitable Substrates
When properly prepared, suitable substrates include:
• Concrete*
• Plywood
• Gypsum
• OSB
• Over most existing vinyl, tile or natural stone floors

* Concrete with moisture vapor emission rates (MVER) up to 5lbs. per 1,000 sq. ft. per 24 hours (2.27 kg/93 m²/24 hours).

Substrate Preparation
Application surfaces shall be free from oil, grease, dust, paint, concrete sealers, floor finishes or curing compounds. Surfaces must be primed with TEC® Multipurpose Primer. Concrete surfaces must be evaluated for high moisture vapor emission. The maximum acceptable moisture vapor emission rate (MVER) is up to 5lbs. per 1,000 sq. ft. per 24 hours (2.27 kg/93 m²/24 hours ) when evaluated by ASTM F1869.

Storage
Store in cool, dry location.

Shelf Life
Maximum of 1 year from date of manufacture in unopened package.

Limitations
• For use with interior floor and counter top only
• Do not apply over wet areas
• Do not use over dimensionally unstable substrates such as particle board, pressboard, lauan plywood, waferboard, tempered hardboard (e.g. Masonite), strip wood flooring or fiberglass
• Do not use in areas subject to hydrostatic pressure from beneath the membrane
• Do not for use over cracks or control joints subject to out-of-plane movement or in-plane movement greater than 3/8" (9 mm)
• Not for use over expansion joints refer to TCNA Handbook Detail EJ-171

Cautions
Read complete cautionary information printed on product container prior to use. For medical emergency information, call 1-888-853-1758.

This Product Data Sheet has been prepared in good faith on the basis of information available at the time of publication. It is intended to provide users with information about and guidelines for the proper use and application of the covered TEC® brand product(s) under normal environmental and working conditions. Because each project is different, H.B. Fuller Construction Products Inc. cannot be responsible for the consequences of variations in such conditions, or for unforeseen conditions.

5. INSTALLATION INSTRUCTIONS

Application

1. Clean subfloor so it is free of debris and dirt.
2. Apply TEC® Multipurpose Primer to subfloor and let dry. Refer to label for dilution ratio and installation instructions.
3. Measure the area and cut membrane length 6" to 8" (15-20 cm) longer than needed to allow for a trimmed fit. If full coverage is needed, skip step 4.
4. If only treating individual cracks, cut membrane 3 times the width of the largest tile you will be installing.
5. Lay the pre-cut membrane directly on the subfloor with the release liner side down.
6. Trim excess material as needed at walls, corners or termination areas.
7. Repeat steps until entire floor is covered, butting all seams. Make sure seams do not overlap.
8. Pull release liner off membrane while hand-smoothing ridges and air pockets to ensure a good bond with 100% contact with subfloor. **NOTE:** Once release liner is pulled from membrane an immediate bond will form. It may be extremely difficult to pull membrane from floor once bonded.
9. Roll entire installation with a 75-100 lb. (35-45 kg) roller.
10. Tile immediately or cover to protect from debris and potential damage. The use of TEC® brand mortars and grouts is highly recommended. For curing time, refer to manufacturer’s product data sheet.

6. AVAILABILITY

TEC® Premium Tile and Stone Installation Products are available nationwide. To locate TEC® products in your area, please contact:
Phone: 800-832-9002
Website: tecspecialty.com

7. LIMITED WARRANTY

The product(s) covered by this Product Data Sheet are sold subject to a Limited Warranty and related terms. H.B. Fuller Construction Products disclaims the implied warranties of merchantability and fitness for a particular purpose and all incidental and consequential damages arising out of the sale, purchase or use of this product. For Limited Warranty details visit tecspecialty.com. To obtain a hard copy of the Limited Warranty call H.B. Fuller Construction Products at 800-832-9023 or mail a written request to the address in Section 2 of this Product Data Sheet.
