Introducing...
TEC® Level Set® 500 HF
Self-Leveling Underlayment

The Super Smooth SLU

Introducing Level Set 500 HF, TEC’s new high-flow self-leveling underlayment. No other product has a faster flow or provides a smoother surface for today’s thinner floor coverings. In fact, it’s so smooth, adhesives can achieve up to 20% more coverage*. No sanding needed which can cut labor costs by up to 66% over skim coating.

Contractors have confirmed that Level Set 500 HF mixes, heals and handles better than their current high-flow SLU. Give it a try and see for yourself.

Suitable Substrates

When properly prepared, suitable substrates include:

- Concrete
- Pavers
- Cement backerboard
- Hardwood flooring, minimum 3/4”
- Exterior grade plywood (with reinforcement lath)
- Gypsum substrates (properly primed) minimum tensile bond strength 72 psi (0.5 MPa)

Features and Benefits

- Exceptional flow and healing properties that yield a super smooth surface
- Once cured, no need for additional sanding or skim coating
- Can be feathered to adjoining elevations
- Get up to 20% more coverage from adhesives* 
- Pourable or pumpable for interior applications
- Formulated for fast-track applications - walkable in 2-3 hours
- Install moisture sensitive floor covering in 15 hours and ceramic tile in 2-3 hours
- Compatible with all types of floor covering - wood, vinyl planks & sheet goods, linoleum, rubber, ceramic LFT, VCT etc.
- Contributes to LEED® project points
- Zero VOC
