tecspecialty.com

3. DESCRIPTION
TEC® Fast-Set Deep Patch is a cement-based underlayment designed specifically for deep fills, ramping, and leveling concrete and plywood subfloors (dry areas only) from featheredge up to 1½” (38 mm) in a single application, up to 5” (12 cm) with proper aggregate. Can be applied with steel trowel, float and/or screed to produce a smooth, level surface. TEC® Fast-Set Deep Patch cures to a walkable surface in approximately 60 minutes.

Key Features and Benefits
• Calcium aluminate technology for rapid strength development
• Interior/exterior use (use TEC® Patch Additive for exterior use)
• Featheredge to 1½” (38 mm) in a single application, up to 5” (12 cm) with proper aggregate
• Fast-set — allows for quick installation
• High bond and compressive strengths
• Provides smooth surface ready to accept flooring
• Self-drying formula
• Contributes to LEED® project points
• VOC 0

Packaging
25 lb. plastic bags (11.34 kg) Product #7056893011
25 lb. moisture-resistant bags (11.34 kg) Product #7056893017

Coverage
Coverages shown are approximate. Actual coverages may vary according to substrate conditions and thickness of applications.

<table>
<thead>
<tr>
<th>Application Depth</th>
<th>Approximate Coverage per 25 lbs. (11.34 kg)</th>
</tr>
</thead>
<tbody>
<tr>
<td>½” (3 mm)</td>
<td>30-32 sq. ft. (2.8-3.0 m²)</td>
</tr>
<tr>
<td>¼” (6 mm)</td>
<td>15-16 sq. ft. (1.4-1.5 m²)</td>
</tr>
<tr>
<td>⅛” (12 mm)</td>
<td>7-8 sq. ft. (0.65-0.74 m²)</td>
</tr>
<tr>
<td>1” (25 mm)</td>
<td>3½-4 sq. ft. (0.33-0.37 m²)</td>
</tr>
</tbody>
</table>

Suitable Substrates
When properly prepared, suitable substrates include:
• Concrete
• Burnished concrete*
• Epoxy terrazzo*
• Cement terrazzo
• Epoxy coatings*
• Ceramic tile (including porcelain and quarry tile)*
• Exterior grade plywood, APA grade trademarked exterior plywood, C-C (plugged) or better (no additive needed)
• Gypsum Substrates* - minimum tensile bond strength 72 psi (0.5 MPa)

*Requires priming with TEC® Multipurpose Primer

Fast-Set Deep Patch is a cement-based underlayment designed specifically for deep fills, ramping, and leveling concrete and plywood subfloors (dry areas only) from featheredge up to 1½” (38 mm) in a single application, up to 5” (12 cm) with proper aggregate. • Exterior grade plywood, APA grade trademarked exterior plywood, C-C (plugged) or better (no additive needed)
• Gypsum Substrates* - minimum tensile bond strength 72 psi (0.5 MPa)

*Requires priming with TEC® Multipurpose Primer

Substrate Preparation
All surfaces must be structurally sound, dry and free from oil, grease, dust, loose or peeling paint, sealers, floor finishes, curing compounds or any contaminant that would prevent a good bond. Concrete and cementitious substrates must be fully cured and free of any hydrostatic pressure or excessive moisture. TEC® Fast-Set Deep Patch can be installed over green concrete with RH of 99% or less. This product is not a moisture vapor barrier. If substrate moisture content exceeds the maximum allowed by the flooring manufacturer, then moisture mitigation must be applied prior to application of Fast-Set Deep Patch. To reduce moisture vapor emissions to an acceptable level, use TEC® LiquiDam™ Penetrating Moisture Vapor Barrier or LiquiDam EZ™ Moisture Vapor Barrier (see product data sheets for details). All surface protrusions must be removed by sanding, scraping or chipping. Remove all dust by vacuuming. For surfaces that require priming, use TEC® Multipurpose Primer per label instructions. Not recommended for use over expansion or control joints.

Notes: Vinyl asbestos tile or any substrate containing asbestos must not be sanded, scored or scarified because of the potential health hazard of breathing dust. Any substrate containing asbestos must be handled in accordance with existing EPA regulations. Contact your local EPA office.

Storage
Store in a cool, dry area. Do not store open containers.

Shelf Life
Maximum shelf life is from date of manufacture in unopened package.
Plastic bag: 3 years Moisture-resistant bag: 1 year

Limitations
• Do not apply when the temperature is at or expected to be below 50°F (10°C).
• Not for use in conditions of hydrostatic pressure or excessive moisture [when RH is greater than 99% or 15 lb. per 1000 ft² (0.07 kg/m²) per 24 hours].
• Not recommended for use as a wear surface.
• Not for use over sealed concrete, resilient flooring, strip wood flooring, tempered hardboard, particle board or lauan plywood.

Cautions
Read complete cautionary information printed on product container prior to use.

For medical emergency information, call 1-888-853-1758.

This Product Data Sheet has been prepared in good faith on the basis of information available at the time of publication. It is intended to provide users with information about and guidelines for the proper use and application of the covered TEC® brand product(s) under normal environmental and working conditions. Because each project is different, H.B. Fuller Construction Products Inc. cannot be responsible for the consequences of variations in such conditions, or for unforeseeen conditions.

5. INSTALLATION INSTRUCTIONS

Mixing
Slowly add the entire bag of TEC® Fast-Set Deep Patch to 2-2½ quarts (1.9-2.4 L) of clean, cool water and mix with a high power drill (300 RPM). Avoid breathing dust and contact with eyes and skin. Mix thoroughly to a smooth, lump-free consistency. Smaller amounts may be hand mixed, 3½ parts TEC® Fast-Set Deep Patch to 1 part water.

Application
Immediately after mixing, apply TEC® Fast-Set Deep Patch onto the flooring substrate. Using a trowel or screed, work the material into the substrate and then finish with a steel trowel to a smooth level surface. Working time is approximately 15-20 minutes, depending on ambient temperature and relative humidity. High temperatures and low humidity will shorten working time. TEC® Fast-Set Deep Patch can be applied from a featheredge up to 1½” (38 mm) depth in a single application. Up to 5” (12 cm) thickness may be poured with the addition of aggregate [well-graded, washed, and dried at 1⁄8” or 1⁄4” (3-6 mm)]. To ensure proper bond, all aggregate and substrate must be completely coated with the underlayment mixture. Do not use sand. For further information, please contact your TEC® representative.

Curing
TEC® Fast-Set Deep Patch achieves walkable hardness in approximately 60 minutes. Installation of most floor covering materials can be applied within 1 to 1½ hours. When hot, dry or windy weather conditions exist, TEC® Fast-Set Deep Patch should be protected to avoid rapid water loss during curing period. TEC® Fast-Set Deep Patch is cement-based, and all general rules of concrete work should be observed to achieve maximum results. Never use forced air to accelerate the drying of TEC® cement-based products. For best results, always test performance of finished floor systems prior to application.

Clean-up
While material is still fresh, clean tools, hands and equipment with warm soapy water.

6. AVAILABILITY
TEC® Premium Tile and Stone Installation Products are available nationwide.
